

StrongArm™ HVR303

**BLUE GIANT**®

**POWDERCOAT**

**STRONGARM**™  
Vehicle Restraint  

VEHICLE RESTRAINT SYSTEM  
BUILT STRONG | HOLDS STRONG

## STANDARD FEATURES

- A Built to Last:** PowderCoat™ finish steel housing is designed for long-term performance and protects internal components from collision damage, corrosion, rusting and abrasions.
- B Low Profile Carriage:** 9" (228mm) above grade and complies with NHTSA guidelines.
- C Rotating Hook:** High visibility electro-mechanical hook secures ICC bars from 9" to 26" (228mm to 660mm) above grade.
- D Lip Guide:** Prevents the dock leveler lip from impacting the restraint.
- E Submersible Motor:** IP67-rated motor is submersible up to 3.3' (1m).
- F ICC Bar Guide:** Steel mechanism ensures proper positioning of the restraint when contacted by an incoming truck.
- G Blue Genius™ Gold Series II:** Touch Control Panel with advanced lights communication package, audible alarm and touch buttons, and driver warning signs enable safe and efficient operation of the HVR303.

Many parts may be interchangeable with similar models.  
 † Sizes are not to scale.

## STRENGTH YOU CAN DEPEND ON

- With a restraining force of 32,000 lb (14,545 kg), the StrongArm™ HVR303 helps prevent the dangers associated with unexpected horizontal or vertical trailer movement.
- A high visibility hook-style restraint arm safeguards against unscheduled truck departures, keeping cargo, equipment, and forklift operators safer during loading and unloading.
- A rugged steel ICC bar guide accurately guides arm positioning.
- Complies with ANSI MH30.3 Standard.

## INSTANT MECHANICAL COMPENSATION FLOAT

- The HVR303 services a wide variety of trailers, including those with bent or damaged ICC bars.
- Ability to adjust automatically to trailer motion ensures compatibility with air-ride suspension systems.

## GREEN POWER

- Powered by electricity, the HVR303 is an environmentally sustainable alternative to hydraulic systems.
- Low operating cost: only pennies an hour.
- Can be interlocked with Blue Giant air-powered dock levelers to build a 'green' loading dock solution, allowing builders and developers to qualify for government incentives.

## INTELLIGENT TOUCH CONTROLS

- The Blue Genius™ Gold Series II Touch Control Panel features include an LCD menu screen, function buttons and a flat-surface keypad with unique touch sensors.
- Interior and exterior LED lights keep drivers and warehouse personnel advised of safety conditions.
- Audible alarm built into the control panel alerts the dock attendant to potentially unsafe conditions, such as broken or missing ICC bars.
- Audible touch buttons and keypad provide instant sound feedback to user input.

## A SOLUTION FOR SPECIAL APPLICATIONS

- The HVR303 is wall-mounted, which presents an ideal solution for sites that do not support ground mounting.
- Minimal clearance is required for successful engagement, ensuring compatibility with vehicles that feature an obstructed ICC bar (e.g. vehicles with pintle hitches, B-train connections, and brake modules).

## POWDERCOAT

Complete powder coat system prolongs the life of your dock equipment. This process is proven to be an effective rustproof solution which creates a safer work environment.
